### SAFETY INSTRUCTIONS

- Do not pour liquids on speaker system - this may cause driver cone destruction and unappealing speaker appearance. Do not allow direct sunlight on speaker cone - this will reduce its resource dramatically. For fire safety do not install speaker system near open flames or heating elements.
- Do not use speaker system with damaged speakON or speaker cable - this is an electric shock hazard and fire hazard.
- Make sure the speaker system is firmly set up on ceiling, stage, or wall (where applicable).
- While setting speaker system up on slope or slippery surface, make necessary arrangements to avoid its movement due to its vibration.
- The speaker system is capable of delivering a significant sound pressure levels. To avoid permanent or temporary hearing damage, prolonged exposure to sound pressure levels exceeding 90 dB should be limited.

### CONNECTIONS

Use Hi-pass filter to prevent speaker damage and distorted sound by eliminating low non-audible frequencies in input signal.

Do not exceed input powers, abovementioned in specifications, while exploiting the speaker system.
